The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/587,785	Applicant(s) FALVEY ET AL.	
	Examiner RAJNIKANT B. PATEL	Art Unit 2838	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) The invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Piovaccari et al. (U.S. Patent # 6,229,289).

Art Unit: 2838

Piovaccari et al. discloses claimed subject matters a DC/DC voltage regulator (figure 1-4), including a linear regulator with a linear drop out feedback signal (figure 3, item 105 and 106), a switch-mode regulator with switch-mode (PWM) feedback signal (figure 3, item 101,103, 104 and 106) and a feedback network with error amplifier (column 6-8, line 1-65 and figure 4).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Piovaccari et al. (U.S. Patent # 6,229,289) in combinations with Jordan (U.S. Patent # 6,522,116).

Piovaccari et al. disclose the claimed subject matters as explained in the claim 1, above, except the utilization of the technique for a sensing the current flowing through the linear regulator as well as switch-mode regulator. Jordan teaches the utilization of the similar technique for a sensing the current flowing through the linear regulator as well as switch-mode regulator column 7-8, line 1-65 and figure 3 and 4). It would have been obvious one having ordinary skill in the art at the time the invention was made to

Art Unit: 2838

modify Piovaccari et al.'s regulator by utilizing the technique taught by Jordan for the purpose of improving the current limit effect of slope compensation are minimized.
